

B	I	N	G	O
trapezium	acute triangle	four sides with one pair that are parallel	scalene	parallelogram
equilateral	three sides of the same length	rectangle	both diagonals inside the shape	right angled triangle
three sides of different length	two pairs of equal adjacent sides	FREE	concave	kite
obtuse triangle	square	one reflex angle	isosceles	quadrilateral
irregular	convex	rhombus	two sides of the same length and only two identical angles	four sides of different lengths

B	I	N	G	O
two pairs of equal adjacent sides	both diagonals inside the shape	scalene	equilateral	rectangle
four sides with one pair that are parallel	two sides of the same length and only two identical angles	parallelogram	convex	right angled triangle
obtuse triangle	concave	FREE	kite	acute triangle
isosceles	rhombus	trapezium	four sides of different lengths	square
one reflex angle	quadrilateral	three sides of different length	three sides of the same length	irregular

B	I	N	G	O
convex	rhombus	both diagonals inside the shape	quadrilateral	concave
trapezium	obtuse triangle	one reflex angle	three sides of the same length	parallelogram
three sides of different length	four sides of different lengths	FREE	square	isosceles
two pairs of equal adjacent sides	right angled triangle	scalene	two sides of the same length and only two identical angles	four sides with one pair that are parallel
kite	acute triangle	rectangle	equilateral	irregular
