

B	I	N	G	O
Standing paracentesis order	1 patients who has failed every treatment	Google said it could be cancer	Patients submits their own appeal and it gets denied.	Patient brings snacks for the staff
Diarrhea yesterday - constipated today	Same patient calls at least 8 times in 1 day	Patient shows up for an apt that is scheduled in the future	Add EGD to already scheduled colonoscopy - THIS WEEK	Patient who doesn't understand what a CLEAR liquid is
Pt didn't get labs/tests done so follow up apt is pointless	Stool sample brought to office	FREE	Can I be seen this week	I've never had a colon/EGD before but we have the last report...
It's urgent; I've had this problem at least 6 months	Pt brings photos of stool for doctor to review	Not been seen in at least 4 years - wants refill	I stopped my meds because I felt better. Now my symptoms are back what should I do?	Patient has no idea why they need to see a GI doctor
I ONLY want to talk to the doctor	Can you explain everything again to my wife/husband	Patient that says "Every prep makes me sick" I can't prep	Walk in patient - NOT for our office	Doctor makes a last minute schedule change; Must be at least a whole day or longer
