Cardiac review

peripheral arterial disease (PAD)	Angina	Hypertension and classification	cholesterol levels	Pulmonary circulation
ECG	peripheral arterial disease (PAD)	Right sided heart failure	Cardiac arrhythmias	abdominal aortic aneurysm
myocardial infarction	peripheral venous disorders	**FREE**	Cardiomyopathy	NYHA classification for heart failure
Nitroglycerin	infective endocarditis	Pacemaker	Location for apical pulse	Raynaud's phenomenon
Left sided heart failure	Dosage calculation	Risk factors for heart disease	venous insufficiency	Echo
