

B	I	N	G	O
Tried to look normal while dragging an IV pole	Asked for help immediately apologized for existing	Got tangled in the IV cord like a gremlin	Someone walks in without knocking	Nurse says "We'll get you out of here soon!"
Got blood pressure checked while mid-nap	Told to "stay hydrated" while peeing for the 12th time	Realized you're playing The Bachelor in your mind but with favorite nurses	Caught yourself doing nothing... aggressively	Said "I'm fine" but meant "this is wildly inconvenient for me"
Thought about escaping through the window	Used the call button... for revenge	FREE	Considered unplugging everything just to see how fast they'd move	Made direct eye contact during blood draw
Nodded politely at medical terms you didn't understand	Thought a machine was broken-it wasn't it was you	Nurse left the curtain open-full ass exposure	Listened to hallway gossip like it's a podcast	Pretended to sleep to avoid interaction
Had to repeat "No I'm not dizzy just weird"	Forgot a word made up a new one	Said "I feel fine" while very much not fine	"Oh sorry were you sleeping?" While poking at you	Got tangled in a blanket like a burrito with regret
