

B	I	N	G	O
Where is the hypotenuse located?	Corresponding sides of similar triangles have the same what?	What is a supplementary angle?	What type of triangle has one angle greater than 90 degrees?	What is the measure of the angle supplementary to an angle that is 106 degrees?
What does the long leg of a 30-60-90 degree triangle equal?	What type of triangle is a 30-60-90 and a 45-45-90 degree triangle?	What type of triangle has exactly the same angles and sides?	What does the hypotenuse of a 30-60-90 degree triangle equal?	What type of triangle has two equal sides?
Where is the opposite side located?	What does the hypotenuse of a 45-45-90 degree triangle equal?	FREE	What is the difference between two similar triangles?	What is the measure of the adjacent side of triangle if the opposite side is four the and hypotenuse is five?
What type of triangle has three equal sides?	What is the measure of the angle complementary to an angle that measures 30 degrees?	What type of triangle has no equal sides?	What is the Pythagorean Theorem?	What is the term used to describe the angle inside a shape?
What does the leg of a 45-45-90 degree triangle equal?	What type of triangle has three angles less than 90 degrees?	What does the short leg of a 30-60-90 degree triangle equal?	Which side is touching the given angle but is not the hypotenuse?	What is a complementary angle?
