

B	I	N	G	O
the small thin covering around a cell	a group of cells that join and work together	cell membrane	store water food and wastes	organ
a living thing made up of cells	the simplest organism	organism	a group of organs that work together	smallest living thing
the center of a cell (the brain)	tissue	FREE	a group of tissues that join and work together	mitochondria
nucleus	tells other parts of the cells what to do	objects that are so small they can only be seen under a microscope	microscope	organ system
cytoplasm	a jelly-like substance that keeps the cell healthy	protist	vacuoles	cell
