

Unnecessary use of clip art	"Beyond the scope of this work"	"...et al"	Entire slide filled with equations	Stresses importance of work
Question and answer are unrelated	Dennis question	Turns back to audience	Runs out of time	"Future work will..."
Tiny images/text	Use of irrelevant quotation	You're completely lost	"That's a good question"	Repeated references to talk outline
Makes up new jargon	Cell phone goes off	Neatly answered Dennis question	Taxonomy fight!	Overly complex graph
Someone's snoring	Tenuous connection to climate change	Spends too long discussing other peoples' work	Host professor sucks up to speaker	Most important slide impossible to read

Goes through slides too quickly to read them	Reads slide verbatim	Neatly answered Dennis question	Fails to notice major typos	"The data *clearly* show..."
Assumes everyone gets obscure references	Repeated bragging about quantity of data	Question turns into personal conversation	Plain white background	"More research is needed"
Tiny images/text	Surprised by own content	You\'re completely lost	Makes up new jargon	Name drops people you've never heard of
Turns back to audience	"Future work will..."	Use of irrelevant quotation	Too quiet to hear	"Data" used as a singular
Repeated references to talk outline	"That's a good question"	Most important slide impossible to read	Dodges question by offering to discuss it later	Entire slide filled with equations

Too quiet to hear	Someone leaves early	Uses acronyms more than words	Talk interrupted by question that will be answered within talk	Spends too long discussing other peoples' work
Runs out of time	Taxonomy fight!	"The data *clearly* show..."	Bashes others' work	Question turns into personal conversation
Dennis question	Someone's snoring	You're completely lost	References advisor (past or present)	"Data" used as a singular
Makes up new jargon	"...et al"	Plain white background	Repeated bragging about quantity of data	Unnecessary use of clip art
Apologizes to audience	Work has no obvious importance to anyone except speaker	Wall o' text slide	Dodges question by offering to discuss it later	"More research is needed"
