·When working outdoors in the heat protect your skin from your head to your feet.	At work and play - let safety lead the way	·Don't wait for equipment to break - preventive actions are important to take!	·Wearing PPE is the right thing to do for you and me.	·Safety risks aren't yours to take. You're not the only one who will suffer from your mistake.
·A trip to the hospital takes a lot longer than putting on your safety gear.	·When the sun is high take cover in the shade; this is a safety guideline that needs to be obeyed.	·Take cover indoors when you hear thunder pound even if there's no visible lightning around.	Avoid the worst - put safety first	·The way you sit is no minor thing - pain is what an uncomfortable workspace will bring!
·When should you report a safety concern? Right away - as soon as you learn!	·Your chair is your throne - adjust it to fit your work needs alone.	**FREE**	Be aware - take care	·Keep cords out of the way so that on your feet you can stay!
·Life is too short to take unnecessary chances.	·When lightning is something you can see indoors is where you need to be.	·Safety first last and forever.	·It costs less to be safe every day than to make one careless mistake along the way.	·Sit up straight as you type away will help keep you safe throughout the workday.
·Don't wait until you're thirsty to drink - you're body needs water before about it you'll think.	Success is no accident	·The time you spend putting on safety gear makes a safe end to your shift all the more near.	·\"L\" is for lifting - Lift with your legs and leave your back out of it.	·At your desk do not slouch - or later you'll be saying ouch!
