can list the organs of the nervous system	can explain cardiac muscles	can explain how the respiratory system and the circulatory system work together	can explain valid experiments	can explain tendons and ligaments
can explain dependent variables	can list the organs of the excretory system	can explain the purpose of the skeletal system	can explain chemical digestion	can list the organs of the digestive system
can list the organs of the respiratory system	can explain constant or controlled variables	can explain mechanical digestion	can explain sample size	can list the organs of the circulatory system
can explain smooth muscles	can explain the scientific method	can explain independent variables	can explain the integumentary system	can explain control groups
can explain voluntary muscles	can explain experimental groups	can name three lab safety procedures	can explain how the digestive system and excretory system work together	can explain involuntary muscles
