

B	I	N	G	O
reactant	atom	color	physical change	exothermic
chemical property	product	malleability	catalyst	odor/smell
precipitate	solubility	FREE	change of state	ductility
element	physical property	endothermic	density	law of conservation of mass
compound	chemical change	molecule	thermal conductivity	chemical reaction

B	I	N	G	O
solubility	catalyst	physical change	chemical property	malleability
color	thermal conductivity	exothermic	chemical change	odor/smell
element	change of state	FREE	ductility	atom
density	molecule	reactant	chemical reaction	physical property
endothermic	law of conservation of mass	precipitate	product	compound
