

B	I	N	G	O
producer	Energy flows from one link to the next.	carnivores	predators	habitat
When other organisms die _____ break down the dead material.	primary consumer	herbivores	Rabbits deer and cows are examples of what?	omnivores
prey	producers	FREE	Shows how an organism can get energy from more than one source.	decomposers
food chain	prey	food web	consumers	herbivore
consumer	What always makes up the first link in a food chain?	omnivore	secondary consumer	_____provides energy for producers.
