

Animal and Plant Cells Bingo Call Sheet

This is a randomized list of all 24 bingo events in square format that you can mark off in order, choose from randomly, or cut up to pull from a hat:

a group of tissues that join and work together	tissue	tells other parts of the cells what to do	cell membrane	store water food and wastes
mitochondria	nucleus	a group of cells that join and work together	a group of organs that work together	a living thing made up of cells
the small thin covering around a cell	organ system	a jelly-like substance that keeps the cell healthy	the simplest organism	organ
cell	organism	cytoplasm	protist	the center of a cell (the brain)
smallest living thing	microscope	vacuoles	objects that are so small they can only be seen under a microscope	

B	I	N	G	O
cell membrane	objects that are so small they can only be seen under a microscope	a living thing made up of cells	tissue	tells other parts of the cells what to do
vacuoles	the simplest organism	store water food and wastes	nucleus	a group of tissues that join and work together
protist	cytoplasm	FREE	organ system	a group of organs that work together
cell	mitochondria	the center of a cell (the brain)	organ	a group of cells that join and work together
microscope	smallest living thing	a jelly-like substance that keeps the cell healthy	the small thin covering around a cell	organism

This bingo card was created randomly from a total of 24 events.

a group of cells that join and work together, a group of organs that work together, a group of tissues that join and work together, a jelly-like substance that keeps the cell healthy, a living thing made up of cells, cell, cell membrane, cytoplasm, microscope, mitochondria, nucleus, objects that are so small they can only be seen under a microscope, organ, organ system, organism, protist, smallest living thing, store water food and wastes, tells other parts of the cells what to do, the center of a cell (the brain), the simplest organism, the small thin covering around a cell, tissue, vacuoles.
