

Custom Bingo Call Sheet

This is a randomized list of all 37 bingo events in square format that you can mark off in order, choose from randomly, or cut up to pull from a hat:

decreased stimuli	caput succedaneum	Apgar	sucking reflex	stepping
cephalhematoma	APGAR	hip dysplasia	bonding process	120-140
babinski	most common congenital defect	microcephaly	skin to skin	moro
hip click	neonate	cleft lip	Trisomy 21	Family
30-60	herpes gonorrhea	rubella syphillus HIV	Hepatitis B	vernix caseosa
neonate	bulb syringe	permanent neuro damage	3 C's	signs of prematurity

Custom Bingo Call Sheet

This continues the randomized list of all 37 bingo events. The bingo squares are aligned on each page to allow for easier cutting.

24 hours	acrocyanosis	cleft palate	neonatal abstinence syndrome	patent airway
Imperforate anus	Vitamin K			

B	I	N	G	O
babinski	most common congenital defect	neonate	neonatal abstinence syndrome	neonate
Apgar	cephalhematoma	caput succedaneum	30-60	cleft palate
24 hours	cleft lip	FREE	3 C's	vernix caseosa
decreased stimuli	stepping	acrocyanosis	bulb syringe	Family
microcephaly	Imperforate anus	Trisomy 21	120-140	skin to skin

This bingo card was created randomly from a total of 37 events.
 120-140, 24 hours, 3 C's, 30-60, APGAR, Apgar, Family, Hepatitis B, Imperforate anus, Trisomy 21, Vitamin K, acrocyanosis, babinski, bonding process, bulb syringe, caput succedaneum, cephalhematoma, cleft lip, cleft palate, decreased stimuli, herpes gonorrhoea, hip click, hip dysplasia, microcephaly, moro, most common congenital defect, neonatal abstinence syndrome, neonate, neonate, patent airway, permanent neuro damage, rubella syphilis HIV, signs of prematurity, skin to skin, stepping, sucking reflex, vernix caseosa.

B	I	N	G	O
Vitamin K	decreased stimuli	Family	Imperforate anus	neonate
APGAR	caput succedaneum	acrocyanosis	bulb syringe	hip click
Trisomy 21	3 C's	FREE	skin to skin	sucking reflex
herpes gonorrhea	neonatal abstinence syndrome	24 hours	hip dysplasia	vernix caseosa
microcephaly	120-140	Hepatitis B	permanent neuro damage	cephalhematoma

This bingo card was created randomly from a total of 37 events.

120-140, 24 hours, 3 C's, 30-60, APGAR, Apgar, Family, Hepatitis B, Imperforate anus, Trisomy 21, Vitamin K, acrocyanosis, babinski, bonding process, bulb syringe, caput succedaneum, cephalhematoma, cleft lip, cleft palate, decreased stimuli, herpes gonorrhea, hip click, hip dysplasia, microcephaly, moro, most common congenital defect, neonatal abstinence syndrome, neonate, neonate, patent airway, permanent neuro damage, rubella syphilus HIV, signs of prematurity, skin to skin, stepping, sucking reflex, vernix caseosa.
